

ALAN MARTIN

FRONT-END WEB DEVELOPER

PROFILE

As a former Chef having worked at some of Canada's top restaurants, I bring a unique set of skills to Front-End Web Development. With my attention to detail, eye for design and my ability to work with others, I can turn problems into solutions. After 10 years of working in the culinary industry, I decided to leave my passion for food at home, and to use what once drove me as a Chef, in Web Development. As a recent grad of Juno College's Web Development Immersive Bootcamp, I have learned what it takes to make a website responsive and accessible using modern frameworks like React JS, while also building strong foundations in JavaScript, HTML5, CSS and SCSS.

SKILLS

- HTML5, CSS3, Sass
- JavaScript fundamentals, jQuery, React
- Working with APIs, and Firebase
- Responsive design
- Website accessibility requirements
- Version control & collaboration using Git and GitHub
- Paired programming & team-based development
- Using a modern text editor, snippets and Emmet
- Project scope management
- Best practices for modern web development

PORTFOLIO

Print Shoppe (E-Commerce Site)

HTML5 | React | Sass | Firebase

"Print Shoppe" was my first application built with React JS and Firebase. This app highlights my journey as a photographer and acts as a marketplace for prints from my collection.

[Live Version](#)

Trivia TV

HTML5 | jQuery | JavaScript | Sass

"Trivia Tv" is a fun and interactive trivia game and my first introduction to paired programming. The user is given a chance to test their knowledge of pop culture with ten randomly generated questions from the Trivia DB API.

[Live Version](#)

Delicious (Three Page Client PSD Conversion)

HTML5 | Sass

"Delicious" is a fully responsive three page PSD conversion. Using modern CSS layout tools like Flex Box allowed reduced media queries and a layout that is scaled to best fit the user's device.
